## GASOLINE FINDER, WATER FINDING PASTE

### GASOLINE FINDER

GASOLINE FINDER is a product which changes colour to red when in contact with petrol etc.

### INSTRUCTIONS FOR USE

A small quantity of GASOLINE FINDER is spread on a gauge or measuring tape. When the measuring instrument has been in contact with petrol etc., the colour of the GASOLINE FINDER will have changed to red, so that the level can easily and exactly be ascertained.

### WATER FINDING PASTE

For determining water under petrol and light mineral oils. WATERFINDING PASTE is a product which shows the presence of water under petrol and light mineral oil by a bright red, sharply marked colour change.

### APPLICATION

WATERFINDING PASTE is an indispensable aid in measuring the amount of water which may be present under petrol or light mineral oils. It is therefore important for stock control and checking deliveries. Since water is the cause of corrosion in storage tanks, which may be used, for example, for central heating installations, a check on the presence of water is extremely important. The leaks caused by such corrosion can entail enormous costs, for which the owner of the tank is responsible. Water is formed by condensation or accompanies the oil when filled.

### INSTRUCTIONS FOR USE

Put the paste on the bottom of the dip stick and let this down to the bottom of the tank immediately on pulling up the water level can be read by a sharp red colour.
